

## 01.1c Prioritised place risk assessment form

This risk assessment has been devised to support providers in maintaining the safety and well-being of all children and staff as they offer prioritised places. It acknowledges that some of those places will be for vulnerable children who already have additional needs and who will require their existing risk assessment to be updated. The list of examples given here is not exhaustive and should be added to with any specific considerations. Additions and amendments should be added to this form and a new form completed and attached to this original form as required. A separate form should be used for individual children, whole groups and specific areas.

If, following risk assessment and control measures, the level of risk remains high and the risk of harm remains very likely then the place should not be offered.
